

NEW UPDATES REGARDING MCFS CRT EQUIPMENT DONATIONS.

Older style TV's and computer monitors, which contain CRT (leaded) glass, are very harmful to our environment if not properly handled during the disposal process. Proper disposal is easy, but can be costly.

Due to an increase in processing fees for the recycling and/or proper disposal of these materials, and the volume of which MCFS is currently receiving (reflective of the significant portion of the global electronic waste stream these materials currently make up), we are implementing a fee schedule, effective immediately, for the processing of various TV's and computer monitors.

The following table outlines MCFS' price structure for accepting the below items for recycling and/or proper disposal:

LCD/LED and Plasma Displays: Free

CRTs <19": \$10

CRTs 20-25": \$18

CRTs >26": \$25

Console, DLP, or Rear Projection TVs: \$40

Broken CRTs, LCD, LED, or Plasma: +\$10 environmental charge

MCFS is greatly appreciative of your equipment donations. We are a non-profit 501-c3 company and we are making every effort to keep your costs for recycling and/or proper disposal of the above-mentioned materials low. Your donations equipment donations allow us to provide affordable computers to local schools as well as free technology training to people in need.

We appreciate your support.
